

Robeco Biodiversity Equities D USD

Robeco Biodiversity Equities is an actively managed fund that invests in stocks of companies in countries globally which support the sustainable use of natural resources and ecosystem services to help reduce Biodiversity loss. The selection of these stocks is based on fundamental analysis. The fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on Sustainability-related disclosures in the financial sector. The strategy integrates sustainability criteria as part of the stock selection process and through a theme-specific sustainability assessment. The portfolio is built on the basis of an eligible investment universe that includes companies whose business models contribute to the thematic investment objectives. The assessment regarding relevant SDGs uses an internally developed framework, more information on which can be obtained at www.robeco.com/si. The fund also aims to achieve a better return than the index.

Performance

Indexed value (until 31-08-2025) - Source: Robeco

Performance

Based on transaction prices, the fund's return was 3.31%.

The fund outperformed the broader market in August and was marginally ahead of the investable universe. Key drivers of performance this quarter included Montrose Environmental Group, VF Corp, and Lowe's, all of which responded positively to strong quarterly results. Montrose was a standout, surging 37% after beating earnings expectations by nearly 50% and raising full-year guidance. On the other hand, Beiersdorf, Zebra Technologies, and Veolia Environnement weighed on performance. Beiersdorf came under pressure after downgrading FY25 guidance, citing a more challenging US consumer environment. While we remain confident in the group's medium to long-term prospects, we acknowledge that it may take time to rebuild investor confidence. Zebra also sold off following its results, primarily due to market skepticism surrounding the acquisition of Elo Touch Solutions

Market development

Global markets extended their rally in August, with most major indices posting positive returns. Records continue to be broken despite geopolitical turmoil dominating headlines and growing concerns about the financial returns of AI investment. Nonetheless, the Nasdaq rose more than 1.5%, while the broader S&P 500 gained 2%. In Europe, performance was more subdued, with France once again the laggard, falling -0.9% as political uncertainty around proposed budget cuts weighed on confidence. Asian markets joined the rally, with Japan's Nikkei rising 4% and China's CSI posting an impressive 10% gain, supported by positive economic news and a renewed push for domestic tech.

Expectation of fund manager

As we move further into the second half of 2025, geopolitical concerns will remain on high alert and will require foresight and patience to navigate. We continue to pursue investments that meet our long-term criteria of having a defensible and sustainable competitive advantage with prudent financial exposure. Now that the tariffs have come into effect, the scale of the impact on global trade and corporate profitability will set the tone for the market.

Asset Allocation

Asset allocation		
Equity		97.0%
Cash		3.0%

Sector allocation

The fund invests in companies exposed to the structural growth trends of the 'Biodiversity' theme. As a consequence, the sectors that make up the majority of the universe are consumer staples, industrials, consumer discretionary, materials, utilities and healthcare. These exposures are reflected in the portfolio, but the strategy is based on bottom-up stock selection and the sector exposures will deviate based on where we find price-valuation discrepancies.

Sector allocation		Deviation index	
Food Products	11.4%		10.5%
Chemicals	11.2%		9.8%
Personal Products	10.6%		10.1%
Machinery	9.4%		7.5%
Construction & Engineering	7.7%		7.3%
Electronic Equipment, Instruments & Components	5.6%		4.8%
Specialty Retail	5.5%		3.9%
Multi-Utilities	5.5%		4.8%
Textiles, Apparel & Luxury Goods	4.6%		3.9%
Life Sciences Tools & Services	3.8%		3.1%
Electrical Equipment	3.4%		2.1%
Household Products	3.2%		2.4%
Other	18.1%		-70.1%

Regional allocation

The investible universe is skewed towards Europe given the relative abundance of biodiversity investments in the region. We continued to find more compelling ideas in Europe than in the Americas, which resulted in a larger overweight in the region.

Regional allocation		Deviation index	
Europe	50.9%		34.8%
America	41.6%		-33.8%
Asia	7.5%		-0.7%
Middle East	0.0%		-0.3%

Currency allocation

The strategy is based on bottom-up stock selection. The portfolio is not applying currency hedges.

ESG Important information

The sustainability information in this factsheet can help investors integrate sustainability considerations in their process. This information is for informational purposes only. The reported sustainability information may not at all be used in relation to binding elements for this fund. A decision to invest should take into account all characteristics or objectives of the fund as described in the prospectus. The prospectus is available on request and free of charge on the Robeco website.

Sustainability

The fund's sustainable investment objective is to support the sustainable use of natural resources and ecosystem services that help to reduce Biodiversity threats or restore natural habitats. This is achieved by incorporating sustainability considerations in the investment process by the means of a target universe definition, exclusions, ESG integration, and voting. The fund only invests in companies that have a significant thematic fit as per Robeco's thematic universe methodology. Through screening on both Robeco's internally developed SDG Framework and Robeco's exclusion policy, the fund does not invest in issuers that have a negative impact on the SDGs, are in breach of international norms or where products have been deemed controversial. Financially material ESG factors are integrated in the bottom-up fundamental investment analysis to assess existing and potential ESG risks and opportunities. In addition, where a stock issuer is flagged for breaching international standards in the ongoing monitoring, the issuer will become subject to exclusion. Lastly, the fund makes use of shareholder rights and applies proxy voting in accordance with Robeco's proxy voting policy. For more information please visit the sustainability-related disclosures. The index used for all sustainability visuals is based on MSCI World Index TRN.

SDG Impact Alignment

This distribution across SDG scores shows the portfolio weight allocated to companies with a positive, negative and neutral impact alignment with the Sustainable Development Goals (SDG) based on Robeco's SDG Framework. The framework utilizes a three-step approach to assess a company's impact alignment with the relevant SDGs and assign a total SDG score. The score ranges from positive to negative impact alignment with levels from high, medium or low impact alignment. This results in a 7-step scale from -3 to +3. For comparison, index figures are provided alongside that of the portfolio. Only holdings mapped as corporates are included in the figures.

Use of the United Nations Sustainable Development Goals (SDG) logos, including the colour wheel, and icons shall only serve explanatory and illustrative purposes and may not be interpreted as an endorsement by the United Nations of this entity, or the product(s) or service(s) mentioned in this document. The opinions or interpretations shown in this document hence do not reflect the opinion or interpretations of the United Nations.

Sustainalytics ESG Risk Rating

The Portfolio Sustainalytics ESG Risk Rating chart displays the portfolio's ESG Risk Rating. This is calculated by multiplying each portfolio component's Sustainalytics ESG Risk Rating by its respective portfolio weight. The Distribution across Sustainalytics ESG Risk levels chart shows the portfolio allocations broken into Sustainalytics' five ESG risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+), providing an overview of portfolio exposure to the different ESG risk levels. Index scores are provided alongside the portfolio scores, highlighting the portfolio's ESG risk level compared to the index. Only holdings mapped as corporates are included in the figures.

Environmental Footprint

Environmental footprint expresses the total resource consumption of the portfolio per mUSD invested. Each assessed company's footprint is calculated by normalizing resources consumed by the company's enterprise value including cash (EVIC). We aggregate these figures to portfolio level using a weighted average, multiplying each assessed portfolio constituent's footprint by its respective position weight. For comparison, index footprints are shown besides that of the portfolio. The equivalent factors that are used for comparison between the portfolio and index represent European averages and are based on third-party sources combined with own estimates. As such, the figures presented are intended for illustrative purposes and are purely an indication. Only holdings mapped as corporates are included in the figures.

Engagement

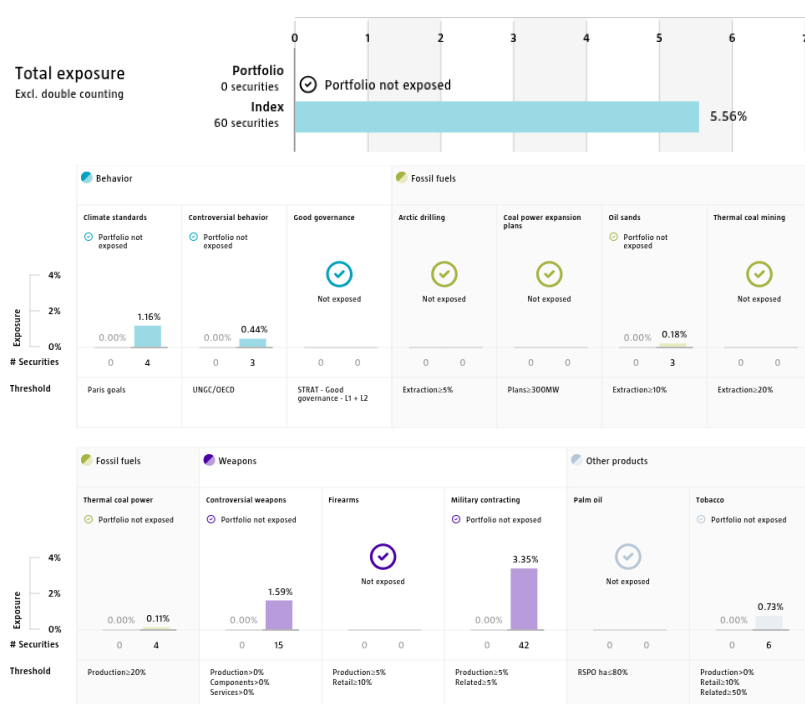

Robeco distinguishes between three types of engagement. Value Engagement focuses on long-term issues that are financially material and/or are causing adverse sustainability impacts. The themes can be broken into Environmental, Social, Governance, or Voting-related. SDG Engagement aims to drive a clear and measurable improvement in a company's SDG contribution. Enhanced engagement is triggered by misconduct and focuses on companies severely breaching international standards. The report is based on all companies in the portfolio for which engagement activities have taken place during the past 12 months. Note that companies may be under engagement in multiple categories simultaneously. While the total portfolio exposure excludes double counting, it may not equal the sum of individual category exposures.

	Portfolio exposure	# companies engaged with	# activities with companies engaged with
Total (* excluding double counting)	47.16%	20	85
Environmental	22.51%	10	25
Social	0.00%	0	0
Governance	15.01%	5	35
Sustainable Development Goals	22.54%	9	24
Voting Related	2.11%	1	1
Enhanced	0.00%	0	0

Investment policy

Robeco Biodiversity Equities is an actively managed fund that invests in stocks of companies in countries globally which support the sustainable use of natural resources and ecosystem services to help reduce Biodiversity loss. The selection of these stocks is based on fundamental analysis. The fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on Sustainability-related disclosures in the financial sector. The strategy integrates sustainability criteria as part of the stock selection process and through a theme-specific sustainability assessment. The portfolio is built on the basis of an eligible investment universe that includes companies whose business models contribute to the thematic investment objectives. The assessment regarding relevant SDGs uses an internally developed framework, more information on which can be obtained at www.robeco.com/si. The fund also aims to achieve a better return than the index.

The fund has sustainable investment as its objective within the meaning of Article 9 of the European Sustainable Finance Disclosure Regulation. The fund aims to support the sustainable use of natural resources and ecosystem services, as well as technologies, products and services that help to reduce Biodiversity threats or restore natural habitats. This is done by investing in companies that advance the following UN Sustainable Development Goals (UN SDGs): Good health and well-being (SDG 3), Industry, innovation and

Fund manager's CV

David Thomas is Portfolio Manager of the Robeco Biodiversity Equities strategy and member of the Thematic Investing team. Prior to joining Robeco in 2022, he was a portfolio manager at Ellerton Capital, managing multiple strategies, including a fund for one of the world's largest sovereign wealth asset owners. David brings 29 years of experience in financial markets having worked for global corporations, including Price Waterhouse Coopers, Macquarie Bank, Morgan Stanley and CLSA. His expertise in equity markets with special focus on the consumer and IT sectors has been honed over multiple roles, both in Sydney and London. David holds a Bachelor of Business from Swinburne University and successfully completed the leadership program at Harvard Business School.

Fiscal product treatment

The fund is established in Luxembourg and is subject to the Luxembourg tax laws and regulations. The fund is not liable to pay any corporation, income, dividend or capital gains tax in Luxembourg. The fund is subject to an annual subscription tax ('tax d'abonnement') in Luxembourg, which amounts to 0.05% of the net asset value of the fund. This tax is included in the net asset value of the fund. The fund can in principle use the Luxembourg treaty network to partially recover any withholding tax on its income.

Fiscal treatment of investor

The fiscal consequences of investing in this fund depend on the investor's personal situation. For private investors in the Netherlands real interest and dividend income or capital gains received on their investments are not relevant for tax purposes. Each year investors pay income tax on the value of their net assets as at 1 January if and inasmuch as such net assets exceed the investor's tax-free allowance. Any amount invested in the fund forms part of the investor's net assets. Private investors who are resident outside the Netherlands will not be taxed in the Netherlands on their investments in the fund. However, such investors may be taxed in their country of residence on any income from an investment in this fund based on the applicable national fiscal laws. Other fiscal rules apply to legal entities or professional investors. We advise investors to consult their financial or tax adviser about the tax consequences of an investment in this fund in their specific circumstances before deciding to invest in the fund.
