

Robeco Smart Mobility D EUR

Robeco Smart Mobility is an actively managed sub-fund that invests globally in companies involved in the transformation of the global transportation sector. The selection of these stocks is based on fundamental analysis. The Sub-fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on Sustainability-related disclosures in the financial sector. The strategy integrates sustainability criteria as part of the stock selection process and through a theme-specific sustainability assessment. The portfolio is built on the basis of an eligible investment universe that includes companies whose business models contribute to the thematic investment objectives. The assessment regarding relevant SDGs uses an internally developed framework, more information on which can be obtained at www.robeco.com/si. The Sub-fund's objective is also to achieve a better return than the index.

Performance

Indexed value (until 31-08-2025) - Source: Robeco

Performance

Based on transaction prices, the fund's return was 4.99%.

Battery supply chain players were the month's standouts. SQM and Albemarle supply lithium that powers EV batteries, and both gained in August as spot lithium carbonate prices firmed, contract negotiations stabilized, and investors welcomed management comments that inventory destocking in China is largely complete. CATL, the world's largest battery cell maker and a system integrator for energy storage, rallied after reporting record overseas shipments, a 20% jump in stationary storage orders, and a confirmed supply agreement for BMW's sixth-generation Neue Klasse platform. In the sensing and electronics layer of smart mobility, Hesai, whose LiDAR enables advanced driver assistance and robotaxis, rose on a design win at a top-five global automaker; Ambarella, which supplies computer-vision processors for in-cabin and exterior perception, advanced on news that its new CV3-AD685 chip was selected by a US robotruck startup.

Market development

Together, surging Chinese volumes, resilient lithium pricing, rapid US robotaxi scaling and Europe's policy-driven demand and infrastructure build-out confirm 2025 as a pivotal year for smart mobility. Global EV momentum remained strong in August 2025. China's passenger NEV sales for 1–24 August approached 727 000 units, lifting penetration to nearly 57%; BYD, Leapmotor, Xiaomi and XPeng all set record or near-record deliveries, while firmer lithium prices buoyed producers SQM and Albemarle. Autonomous rollouts also accelerated: Tesla enlarged its paid robotaxi fleet in Austin, and Waymo was logging hundreds of thousands of weekly driverless rides across five US metro areas with Miami, Washington D.C. and Dallas next on its expansion list.

Expectation of fund manager

The underlying fundamentals (as reflected by the core themes addressed by the strategy) are very robust. Technology companies with strong and sustainable moats remain the focus of the strategy's investments. These companies focus on the development of high-voltage electric, low-voltage electronic and software-managed solutions that enable electrification, connectivity and autonomous driving. Other key enabling technologies include battery management systems, power inverters and artificial intelligence (AI). The strategy will also continue to seek exposure to the EV market as well as to companies helping to develop EV infrastructure worldwide.

Top 10 largest positions

Infineon leverages wide-bandgap SiC and GaN power semiconductors to boost efficiency in traction inverters, on-board chargers and DC-DC converters, accelerating the shift to greener, smarter mobility. Analog Devices delivers precision sensing, power management and Ethernet-to-the-edge networking that underpin fast EV charging, software-defined vehicle architectures and quiet cabins, all core to smart mobility. Texas Instruments supplies automotive-grade processors, radar front-ends, and high-efficiency power-management ICs that steer, sense, and energize the vehicle brain, enabling ADAS perception, domain-controller compute, and smooth battery-to-wheels power flow essential to connected, autonomous mobility. Delta Electronics delivers ultra-fast EV chargers, high-density power modules, and active thermal systems that keep batteries cool and electrons flowing – from highway megawatt hubs to fleet depots – forming the backbone of reliable, scalable smart mobility infrastructure. NXP Semiconductors provides secure microcontrollers, radar and V2X connectivity that let vehicles perceive, compute and communicate, forming the digital nervous system of connected, autonomous mobility.

Changes

This share class shows performance information prior to its launch date. On the launch date of this share class, the fund absorbed Multipartner SICAV - Robeco Smart Mobility Fund. Performance prior to the launch date has been simulated on the basis of the past performance of the absorbed fund that had similar investment policy and applied higher or comparable charges.

Asset Allocation

Asset allocation		
Equity		98.1%
Cash		1.9%

Sector allocation

The fund invests in companies exposed to structural growth trends of the 'Smart Mobility' theme. As a consequence, the portfolio is particularly invested in companies in the technology sector, followed by the industrial and consumer discretionary sectors.

Sector allocation		Deviation index	
Semiconductors & Semiconductor Equipment	38.4%		28.4%
Electronic Equipment, Instruments & Components	13.7%		12.9%
Electrical Equipment	12.3%		11.0%

ESG Important information

The sustainability information in this factsheet can help investors integrate sustainability considerations in their process. This information is for informational purposes only. The reported sustainability information may not at all be used in relation to binding elements for this fund. A decision to invest should take into account all characteristics or objectives of the fund as described in the prospectus. The prospectus is available on request and free of charge on the Robeco website.

Sustainability

The fund's sustainable investment objective is to support the transformation and decarbonization of the global transportation sector. The transformation and decarbonization of the global transportation sector and sustainability considerations are incorporated in the investment process by the means of a target universe definition, exclusions, ESG integration, a carbon footprint target and voting. The fund only invests in companies that have a significant thematic fit as per Robeco's thematic universe methodology. Through screening on both Robeco's internally developed SDG Framework and Robeco's exclusion policy, the fund does not invest in issuers that have a negative impact on the SDGs, are in breach of international norms or where products have been deemed controversial. Financially material ESG factors are integrated in the bottom-up fundamental investment analysis to assess existing and potential ESG risks and opportunities. The fund's weighted carbon footprint will be equal to or better than that of its Climate Transition Benchmark. In addition, where a stock issuer is flagged for breaching international standards in the ongoing monitoring, the issuer will become subject to exclusion. Lastly, the fund makes use of shareholder rights and applies proxy voting in accordance with Robeco's proxy voting policy.

For more information please visit the sustainability-related disclosures.

The index used for all sustainability visuals is based on MSCI World Index TRN.

SDG Impact Alignment

This distribution across SDG scores shows the portfolio weight allocated to companies with a positive, negative and neutral impact alignment with the Sustainable Development Goals (SDG) based on Robeco's SDG Framework. The framework utilizes a three-step approach to assess a company's impact alignment with the relevant SDGs and assign a total SDG score. The score ranges from positive to negative impact alignment with levels from high, medium or low impact alignment. This results in a 7-step scale from -3 to +3. For comparison, index figures are provided alongside that of the portfolio. Only holdings mapped as corporates are included in the figures.

Use of the United Nations Sustainable Development Goals (SDG) logos, including the colour wheel, and icons shall only serve explanatory and illustrative purposes and may not be interpreted as an endorsement by the United Nations of this entity, or the product(s) or service(s) mentioned in this document. The opinions or interpretations shown in this document hence do not reflect the opinion or interpretations of the United Nations.

Sustainalytics ESG Risk Rating

The Portfolio Sustainalytics ESG Risk Rating chart displays the portfolio's ESG Risk Rating. This is calculated by multiplying each portfolio component's Sustainalytics ESG Risk Rating by its respective portfolio weight. The Distribution across Sustainalytics ESG Risk levels chart shows the portfolio allocations broken into Sustainalytics' five ESG risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+), providing an overview of portfolio exposure to the different ESG risk levels. Index scores are provided alongside the portfolio scores, highlighting the portfolio's ESG risk level compared to the index.

Only holdings mapped as corporates are included in the figures.

Source: Copyright ©2025 Sustainalytics. All rights reserved.

Environmental Footprint

Environmental footprint expresses the total resource consumption of the portfolio per mUSD invested. Each assessed company's footprint is calculated by normalizing resources consumed by the company's enterprise value including cash (EVIC). We aggregate these figures to portfolio level using a weighted average, multiplying each assessed portfolio constituent's footprint by its respective position weight. For comparison, index footprints are shown besides that of the portfolio. The equivalent factors that are used for comparison between the portfolio and index represent European averages and are based on third-party sources combined with own estimates. As such, the figures presented are intended for illustrative purposes and are purely an indication. Only holdings mapped as corporates are included in the figures.

Engagement

Robeco distinguishes between three types of engagement. Value Engagement focuses on long-term issues that are financially material and/or are causing adverse sustainability impacts. The themes can be broken into Environmental, Social, Governance, or Voting-related. SDG Engagement aims to drive a clear and measurable improvement in a company's SDG contribution. Enhanced engagement is triggered by misconduct and focuses on companies severely breaching international standards. The report is based on all companies in the portfolio for which engagement activities have taken place during the past 12 months. Note that companies may be under engagement in multiple categories simultaneously. While the total portfolio exposure excludes double counting, it may not equal the sum of individual category exposures.

	Portfolio exposure	# companies engaged with	# activities with companies engaged with
Total (* excluding double counting)	27.63%	12	36
Environmental	18.27%	7	27
Social	2.16%	1	3
Governance	2.83%	2	3
Sustainable Development Goals	2.23%	1	2
Voting Related	2.15%	1	1
Enhanced	0.00%	0	0

Investment policy

Robeco Smart Mobility is an actively managed sub-fund that invests globally in companies involved in the transformation of the global transportation sector. The selection of these stocks is based on fundamental analysis. The Sub-fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on Sustainability-related disclosures in the financial sector. The strategy integrates sustainability criteria as part of the stock selection process and through a theme-specific sustainability assessment. The portfolio is built on the basis of an eligible investment universe that includes companies whose business models contribute to the thematic investment objectives. The assessment regarding relevant SDGs uses an internally developed framework, more information on which can be obtained at www.robeco.com/si. The Sub-fund's objective is also to achieve a better return than the index.

The fund has sustainable investment as its objective within the meaning of Article 9 of the European Sustainable Finance Disclosure Regulation. The fund furthes the decarbonization of the global transportation sector through investments in its electrification by investing in companies that advance the following UN Sustainable Development Goals (UN SDGs): Affordable and Clean Energy goal, Decent work and economic growth, Industry, innovation and infrastructure, Sustainable cities and communities, and Climate Action. The fund integrates ESG (Environmental, Social and Governance) factors in the investment process and applies sustainability indicators, including but not limited to Robeco's Good Governance policy, normative, activity-based and region-based exclusions, carbon reduction target and proxy voting.

Fund manager's CV

Pieter Busscher is Portfolio Manager of the Robeco Smart Materials and Robeco Smart Mobility strategies and member of the Thematic Investing team. He started at Robeco in 2007 as a Deputy Portfolio Manager for the Sustainable Water strategy. Pieter became the Portfolio Manager for Smart Materials in 2009; for Smart Mobility he had been Deputy Portfolio for since strategy launch in 2018 and took over the portfolio management responsibilities in 2021. He began his career at Credit Suisse Asset Management in Zurich in 2006. He graduated from the International Business at RSM Erasmus University (Bachelor), the Banking and Finance at the University of St. Gallen (Master) and is a CFA® Charterholder. Clément Chamboulive is Co-Portfolio Manager of the Robeco Smart Mobility strategy and member of the Thematic Investing team. Prior to joining in 2021, he was at the Swiss investment firm 2Xideas, where he worked as an Equity Analyst focusing on Technology and Semiconductors. Prior to that, he founded and ran Kerra GmbH, a provider of independent research and analysis to private and public sector entities. Before that, he spent four years with Baillie Gifford as an investment analyst/manager in different segments, where he started his career in 2011. Clément holds a BSc (Hons) from the University of Edinburgh and MSc from ETH Zurich, both in Physics. Giacomo Fumagalli is Co-Portfolio Manager of the Robeco Smart Mobility strategy and member of the Thematic Investing team. Prior to joining Robeco in 2019, he worked at Lemanik SA, an investment management company located in Lugano, where he was part of the Italian equities team that managed two mutual funds mainly invested in Italian stocks. Previous to that, he worked as Junior Portfolio Manager at Credit Suisse in Milano, where he started his career in 2012, covering European equities for UHNWI discretionary mandates and was Assistant Portfolio Manager of the CS Equity Italy mutual fund. Giacomo holds a M.Sc. in Finance from Bocconi University in Milano as well as a M.Sc. in Accounting and Control from the Rotterdam School of Management (Erasmus University). He is a CFA® Charterholder.

Fiscal product treatment

The fund is established in Luxembourg and is subject to the Luxembourg tax laws and regulations. The fund is not liable to pay any corporation, income, dividend or capital gains tax in Luxembourg. The fund is subject to an annual subscription tax ('tax d'abonnement') in Luxembourg, which amounts to 0.05% of the net asset value of the fund. This tax is included in the net asset value of the fund. The fund can in principle use the Luxembourg treaty network to partially recover any withholding tax on its income.

Fiscal treatment of investor

The fiscal consequences of investing in this fund depend on the investor's personal situation. For private investors in the Netherlands real interest and dividend income or capital gains received on their investments are not relevant for tax purposes. Each year investors pay income tax on the value of their net assets as at 1 January if and inasmuch as such net assets exceed the investor's tax-free allowance. Any amount invested in the fund forms part of the investor's net assets. Private investors who are resident outside the Netherlands will not be taxed in the Netherlands on their investments in the fund. However, such investors may be taxed in their country of residence on any income from an investment in this fund based on the applicable national fiscal laws. Other fiscal rules apply to legal entities or professional investors. We advise investors to consult their financial or tax adviser about the tax consequences of an investment in this fund in their specific circumstances before deciding to invest in the fund.
