

Robeco Financial Institutions Bonds D EUR

Robeco Financial Institutions Bonds is an actively managed fund that mainly invests in subordinated euro-denominated bonds issued by financial institutions. The selection of these bonds is based on fundamental analysis. The fund's objective is to provide long-term capital growth. The fund offers a diversified exposure to subordinated bonds issued by banks and insurance companies and the focus of the fund is, in general, towards higher rated issuers (investment grade).

Jan Willem de Moor, Jan Willem Knoll
Fund manager since 16-05-2011

Performance

Indexed value (until 31-08-2025) - Source: Robeco

Performance

Based on transaction prices, the fund's return was 0.08%.

The positive return was driven by positive carry, while both credit spreads and underlying government bond yields rose a bit. The average index spread ended the month at 131 basis points, 7 basis points higher than at the end of July. The index excess return was -0.14%. The portfolio performance was a bit better than that of the index. The beta positioning of the portfolio was just above neutral, which contributed negatively as credit spreads widened. Issuer selection made a positive contribution. Positive factors within issuer selection were currency positioning (our holdings in USD and GBP outperformed the European market) and country positioning (underweight in France). Bank and insurance CoCos outperformed the benchmark, which contributed positively too. Best-performing positions, on a risk-adjusted basis, were Achmea, Hiscox, mBank and BBVA. The underweight position in Crédit Mutuel Arkea also contributed positively to the performance. The largest detractors from the performance were Swiss Re and Generali – both underweight positions.

Market development

European credit spreads widened slightly in August, while equities and the S&P 500 broadly moved sideways. We await decisions from the ECB and the Federal Reserve in September, with expectations for a Fed rate cut following Powell's dovish Jackson Hole speech. Questions continue to be asked about Federal Reserve independence, which dampened the US Treasury market. While equity markets remained buoyant, signs of stress emerged in European sovereign debt markets. Yields on UK Gilts, French OATs, and German Bunds have risen, particularly at the long end of the curve. In France, ongoing fiscal pressure has been accompanied by political uncertainty, including a prime ministerial confidence vote in early September. French bank spreads suffered on the announcement of the confidence vote. The new issue market was very active in August, with heavy issuance in bank Tier-2 bonds. We participated in new Tier-2 issues of Erste Bank, KBC Bank and CBA. We added new names to the portfolio, as we participated in new bond deals of Saudi Awwal Bank and BSF Finance (Tier 2s issued by Saudi banks) and Triodos Bank.

Expectation of fund manager

Credit spreads in general are reaching cycle lows. At the same time, the financial sector is fundamentally doing well. Hence, we deem spreads for European financial companies to still be relatively attractive. Balance sheets look robust after years of deleveraging. Profitability has benefited from higher interest rates, strong cost control and healthy growth in fee income. Going forward, we expect profitability to plateau at a higher level than observed in the period between the great financial crisis and the Covid-19 crisis, as we do not expect central banks to move back to periods of zero interest rates, while at the same time banks have made strong progress in terms of improving their underlying profitability. A such, the resilience of banks to external shocks has greatly improved. Appetite for bonds with higher yields remains strong, as investors like to lock in attractive yield levels. We are becoming more selective in participating in new bond issues, as spreads have tightened. We continue to target a small overweight beta positioning in the fund, as we see opportunities to buy bonds at attractive levels, in primary or secondary markets.

Top 10 largest positions

The fund has a benchmark that caps benchmark weights at 2%. For diversification reasons, actual individual positions will be limited to 3% at max. Holdings typically consist of exposures to large and strong banks and insurance companies.

Fund price

31-08-25	EUR	186.04

Changes

Changes (only for share classes launched before March 2012) Before March 2012 the benchmark was the Barclays Euro Universal, sub financials index (Investment Grade + High Yield) (EUR). In the current benchmark, High Yield bonds are excluded and the issuers are capped on max. 2% per single issuer, which limits the absolute risk towards a single issuer.

Sector allocation

The fund only invests in financials – excess cash may be invested in (German) government bonds. Government-owned banks such as Belfius Bank, Permanent TSB and De Volksbank are classed as agencies. The exposure to industrials relates to Tier-2 bonds issued by Renault Bank.

Sector allocation		Deviation index
Financials	89.2%	-10.8%
Treasuries	3.9%	3.9%
Agencies	2.1%	2.1%
Industrials	0.4%	0.4%
Cash and other instruments	4.4%	4.4%

Currency denomination allocation

The fund is allowed to invest in currencies other than euros. Approximately 7% of the fund is invested in bonds issued in pound sterling and US dollar. All foreign currency exposures are hedged.

Currency denomination allocation		Deviation index
Euro	88.4%	-11.6%
U.S. Dollar	3.8%	3.8%
Pound Sterling	3.3%	3.3%

Duration allocation

The fund aims to hold an interest rate position that is neutral versus the benchmark.

Duration allocation		Deviation index
Euro	4.1	0.0

Rating allocation

The fund does not follow an active rating strategy – the current rating allocation is a result of bottom-up bond selection. The fund is allowed to invest in high yield to a maximum of 20%, the current exposure is circa 16%.

Rating allocation		Deviation index
AAA	3.9%	3.9%
A	14.1%	-12.3%
BAA	62.0%	-11.6%
BA	14.1%	14.1%
B	0.8%	0.8%
NR	0.6%	0.6%
Cash and other instruments	4.4%	4.4%

Country allocation

Country allocation is to a large extent bottom-up driven. We are underweight in French banks, as spreads are tight. The largest overweight can be found in Spanish banks.

Country allocation		Deviation index
France	12.7%	-8.7%
Netherlands	12.7%	3.6%
Germany	11.1%	-0.4%
Spain	10.9%	1.5%
United Kingdom	10.3%	0.2%
Belgium	6.9%	2.5%
Austria	5.9%	0.3%
Denmark	4.6%	1.9%
Finland	2.7%	0.0%
Italy	2.6%	-3.4%
Switzerland	2.5%	-1.0%
Other	12.7%	-1.1%
Cash and other instruments	4.4%	4.4%

Subordination allocation

The largest part of the portfolio is invested in Tier-2 debt. About three quarter of these bonds are issued by banks, the remainder is issued by insurance companies. The categories Hybrid and Subordinated mostly contains subordinated debt issued by insurance companies. The exposure under Tier 1 mostly relates to bank CoCos. The exposure to senior bonds mainly consists of German Bunds, though we also hold senior bank bonds issued by banks like mBank, Bank Millennium and Banca Transilvania.

Subordination type allocation		Deviation index
Tier 2	71.3%	-15.9%
Tier 1	9.4%	9.4%
Hybrid	8.5%	-4.3%
Senior	6.3%	6.3%
Subordinated	0.1%	0.1%
Cash and other instruments	4.4%	4.4%

ESG Important information

The sustainability information in this factsheet can help investors integrate sustainability considerations in their process. This information is for informational purposes only. The reported sustainability information may not at all be used in relation to binding elements for this fund. A decision to invest should take into account all characteristics or objectives of the fund as described in the prospectus. The prospectus is available on request and free of charge on the Robeco website.

Sustainability

The fund incorporates sustainability in the investment process via exclusions, ESG integration, a minimum allocation to ESG-labeled bonds, and engagement. The fund does not invest in credit issuers that are in breach of international norms or where activities have been deemed detrimental to society following Robeco's exclusion policy. Financially material ESG factors are integrated in the bottom-up security analysis to assess the impact on the issuer's fundamental credit quality. In the credit selection the fund limits exposure to issuers with an elevated sustainability risk profile. Furthermore, the fund invests at least 5% in green, social, sustainable, and/or sustainability-linked bonds. Lastly, where issuers are flagged for breaching international standards in the ongoing monitoring, the issuer will become subject to engagement. For more information please visit the sustainability-related disclosures. The index used for all sustainability visuals is based on Bloomberg Euro Aggregate Corporates Financials Subordinated 2% Issuer Cap.

Sustainalytics ESG Risk Rating

The Portfolio Sustainalytics ESG Risk Rating chart displays the portfolio's ESG Risk Rating. This is calculated by multiplying each portfolio component's Sustainalytics ESG Risk Rating by its respective portfolio weight. The Distribution across Sustainalytics ESG Risk levels chart shows the portfolio allocations broken into Sustainalytics' five ESG risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+), providing an overview of portfolio exposure to the different ESG risk levels. Index scores are provided alongside the portfolio scores, highlighting the portfolio's ESG risk level compared to the index. Only holdings mapped as corporates are included in the figures.

Environmental Footprint

Environmental footprint expresses the total resource consumption of the portfolio per mUSD invested. Each assessed company's footprint is calculated by normalizing resources consumed by the company's enterprise value including cash (EVIC). We aggregate these figures to portfolio level using a weighted average, multiplying each assessed portfolio constituent's footprint by its respective position weight. For comparison, index footprints are shown besides that of the portfolio. The equivalent factors that are used for comparison between the portfolio and index represent European averages and are based on third-party sources combined with own estimates. As such, the figures presented are intended for illustrative purposes and are purely an indication. Only holdings mapped as corporates are included in the figures.

SDG Impact Alignment

This distribution across SDG scores shows the portfolio weight allocated to companies with a positive, negative and neutral impact alignment with the Sustainable Development Goals (SDG) based on Robeco’s SDG Framework. The framework utilizes a three-step approach to assess a company’s impact alignment with the relevant SDGs and assign a total SDG score. The score ranges from positive to negative impact alignment with levels from high, medium or low impact alignment. This results in a 7-step scale from -3 to +3. For comparison, index figures are provided alongside that of the portfolio. Only holdings mapped as corporates are included in the figures.

Source: Robeco. Data derived from internal processes.

ESG Labeled Bonds

The ESG-labeled bond chart displays the portfolio's exposure to ESG-labeled bonds. Specifically, green bonds, social bonds, sustainability bonds, and sustainability-linked bonds. This is calculated as a sum of weights for those bonds in the portfolio that have one of above mentioned labels. Index exposure figures are provided alongside the portfolio exposure figures, highlighting the difference with the index.

	Portfolio weight	Index weight
Green Bonds	7.12%	9.42%
Social Bonds	0.00%	0.84%
Sustainability Bonds	1.17%	2.56%

Engagement

Robeco distinguishes between three types of engagement. Value Engagement focuses on long-term issues that are financially material and/or are causing adverse sustainability impacts. The themes can be broken into Environmental, Social, Governance, or Voting-related. SDG Engagement aims to drive a clear and measurable improvement in a company’s SDG contribution. Enhanced engagement is triggered by misconduct and focuses on companies severely breaching international standards. The report is based on all companies in the portfolio for which engagement activities have taken place during the past 12 months. Note that companies may be under engagement in multiple categories simultaneously. While the total portfolio exposure excludes double counting, it may not equal the sum of individual category exposures.

	Portfolio exposure	# companies engaged with	# activities with companies engaged with
Total (* excluding double counting)	5.44%	3	13
Environmental	3.14%	2	12
Social	0.00%	0	0
Governance	0.00%	0	0
Sustainable Development Goals	0.00%	0	0
Voting Related	2.30%	1	1
Enhanced	0.00%	0	0

Exclusions

The Exclusions charts display the degree of adherence to exclusion applied by Robeco. For reference, index exposures are shown beside that of the portfolio. Thresholds are based on revenues unless otherwise indicated. For more information about the exclusion policy and which level applies, please refer to the Exclusion Policy and Exclusion List available on Robeco.com.

Investment policy

Robeco Financial Institutions Bonds is an actively managed fund that mainly invests in subordinated euro-denominated bonds issued by financial institutions. The selection of these bonds is based on fundamental analysis. The fund's objective is to provide long-term capital growth. The fund offers a diversified exposure to subordinated bonds issued by banks and insurance companies and the focus of the fund is, in general, towards higher rated issuers (investment grade).

The fund promotes E&S (i.e. Environmental and Social) characteristics within the meaning of Article 8 of the European Sustainable Finance Disclosure Regulation, integrates sustainability risks in the investment process and applies Robeco's Good Governance policy. The fund applies sustainability indicators, including but not limited to, normative, activity-based and region-based exclusions, and engagement.

Fund manager's CV

Jan Willem de Moor is Portfolio Manager Investment Grade with a focus on European and financial bonds. Working together with the Insurance and Pensions Solutions team, he is also responsible for the management of buy & maintain portfolios. Prior to joining Robeco in 2005, he worked at the Dutch Medical professionals' pension fund as an Equity Portfolio Manager and at SNS Asset Management as an Equity Portfolio Manager. Jan Willem has been active in the industry since 1994. He holds a Master's in Economics from Tilburg University. Jan Willem Knoll is Portfolio Manager Investment Grade in the Credit team. He joined the Credit team in 2016 as Analyst for the Financials sector. Previously, Jan Willem headed the Financials Equity sell-side research team at ABN AMRO. He started his career in the industry in 1999 at APG, where he held several positions including Portfolio Manager of global insurance portfolio pan-European financials portfolios. Jan Willem holds a Master's in Business Economics from the University of Groningen and he is a CFA® Charterholder.

Team info

The Robeco Financial Institutions Bonds fund is managed within Robeco's credit team, which consists of nine portfolio managers and twenty-three credit analysts (of which four financials analysts). The portfolio managers are responsible for the construction and management of the credit portfolios, whereas the analysts cover the team's fundamental research. Our analysts have long term experience in their respective sectors which they cover globally. Each analyst covers both investment grade and high yield, providing them an information advantage and benefiting from inefficiencies that traditionally exist between the two segmented markets. Furthermore, the credit team is supported by dedicated quantitative researchers and fixed income traders. On average, the members of the credit team have an experience in the asset management industry of seventeen years, of which eight years with Robeco.

Fiscal product treatment

The fund is established in Luxembourg and is subject to the Luxembourg tax laws and regulations. The fund is not liable to pay any corporation, income, dividend or capital gains tax in Luxembourg. The fund is subject to an annual subscription tax ('tax d'abonnement') in Luxembourg, which amounts to 0.05% of the net asset value of the fund. This tax is included in the net asset value of the fund. The fund can in principle use the Luxembourg treaty network to partially recover any withholding tax on its income.

Fiscal treatment of investor

The fiscal consequences of investing in this fund depend on the investor's personal situation. For private investors in the Netherlands real interest and dividend income or capital gains received on their investments are not relevant for tax purposes. Each year investors pay income tax on the value of their net assets as at 1 January if and inasmuch as such net assets exceed the investor's tax-free allowance. Any amount invested in the fund forms part of the investor's net assets. Private investors who are resident outside the Netherlands will not be taxed in the Netherlands on their investments in the fund. However, such investors may be taxed in their country of residence on any income from an investment in this fund based on the applicable national fiscal laws. Other fiscal rules apply to legal entities or professional investors. We advise investors to consult their financial or tax adviser about the tax consequences of an investment in this fund in their specific circumstances before deciding to invest in the fund.
