

## Robeco Smart Materials F CHF

Robeco Smart Materials Equities is an actively managed fund that invests globally in companies that provide innovative materials and process technologies. The selection of these stocks is based on fundamental analysis. The fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on Sustainability-related disclosures in the financial sector. The strategy integrates sustainability criteria as part of the stock selection process and through a theme-specific sustainability assessment. The portfolio is built on the basis of an eligible investment universe that includes companies whose business models contribute to the thematic investment objectives. The assessment regarding relevant SDGs uses an internally developed framework, more information on which can be obtained at [www.robeco.com/si](http://www.robeco.com/si). The fund also aims to achieve a better return than the index.

### Performance

Indexed value (until 31-08-2025) - Source: Robeco

### Performance

Based on transaction prices, the fund's return was 3.30%.

Advanced Materials posted a respectable gain in August. The strong rebound in Transition Metals more than outweighed steady gains in Energy Storage and Resource Recovery, leaving Building Efficiency as the lone muted spot. Huiday Minerals was the standout performer, propelled by a string of positive catalysts: Q2 results topped expectations, and Mitsubishi committed a USD 600 mln investment for a 30% interest in the Copper World project. Those developments drove the shares to their strongest levels in more than a decade. Albemarle and SQM followed suit as spot-lithium prices stabilized and recent supply curtailments in China sparked talk of an earlier-than-expected tightening. Neo Performance Materials climbed after strong Q2 results prompted a full-year EBITDA upgrade and a new multi-year EV-magnet award from a European Tier-1 supplier. The Advanced Equipment subcluster led performance. Innoscience, a global leader in Gallium Nitride power semiconductors, rallied strongly after being included on NVIDIA's supplier list for its next-generation 800 VDC power architecture.

### Market development

Advanced Materials delivered a solid August, powered by a sharp rebound in Transition Metals – Huiday Minerals soared on a copper-rich Mitsubishi JV while stabilizing lithium prices lifted Albemarle and SQM – plus steady gains in Energy Storage and Resource Recovery; only Building Efficiency lagged on softer US housing data and a guidance cut at Gibraltar Industries. Specialty Chemicals were little changed as Corning's Apple glass pact offset profit-taking in Thyssenkrupp Nucera. Smart Manufacturing edged higher but trailed the MSCI World. Advanced Equipment led thanks to Innoscience's landmark NVIDIA design win, strong results at Chroma ATE, and Ambarella's edge-AI demand; Industrial Automation was flat, with post-IPO enthusiasm for Geekplus and a beat from Shenzhen Inovance Technology balanced by weakness at Coherent; Industry 4.0 Software fell as investors rotated out of July's AI winners – Autodesk bucked the trend with a guidance raise, while Cadence and Synopsys slipped on profit-taking. Teradyne was up on potential NVIDIA tester demand, which was offset by weakness in Advantest and ASML.

### Expectation of fund manager

2025 presents a unique opportunity to capitalize on both structural trends and cyclical recovery. Global transitions toward net-zero goals, electrification, and automation and humanoid robots, alongside pro-growth fiscal and monetary policies, are shaping a favorable investment landscape. Expected growth rates remain robust, with projections in the mid-20% range, further supported by the re-emergence of M&A activity across portfolios. Valuation levels also offer attractive entry points, trading below the benchmark.

### Top 10 largest positions

PTC – IoT and PLM software connecting and managing smart, connected products; Onto Innovation – Semiconductor metrology and inspection tools improving yield; SQM – Chile's lithium giant supplying EV and energy-storage batteries; Autodesk – Design software powering architecture, engineering, and manufacturing innovation; Corning – Specialty glass and optical materials for displays, communications, and electronics; Teradyne – Semiconductor and system test equipment ensuring chip performance; Hudbay Minerals – Integrated copper producer powering EV wiring, charging, and grid expansion; Neo Performance Materials – Rare-earth processing and magnet powders enabling high-efficiency EV motors and wind turbines; Aperam – Stainless and specialty steels with circular recycling expertise; Albemarle – Global lithium leader supplying cathode-grade chemicals for EV and energy-storage batteries.

### Fund price

31-08-25	CHF	105.31
High Ytd (22-01-25)	CHF	117.45
Low Ytd (08-04-25)	CHF	83.34

### Fees

Management fee	0.75%
Performance fee	None
Service fee	0.16%

### Legal status

Investment company with variable capital incorporated under Luxembourg law (SICAV)  
 Issue structure Open-end  
 UCITS V Yes  
 Share class F CHF  
 This fund is a subfund of Robeco Capital Growth Funds, SICAV.

### Registered in

Austria, Germany, Liechtenstein, Singapore, Switzerland

### Currency policy

The fund is allowed to pursue an active currency policy to generate extra returns and can engage in currency hedging transactions.

### Risk management

Risk management is fully integrated into the investment process to ensure that positions always meet predefined guidelines.

### Dividend policy

In principle the fund does not intend to distribute dividend and so both the income earned by the fund and its overall performance are reflected in its share price.

Danish Kroner	0.1%		-0.4%
Other	0.0%		-4.8%

## ESG Important information

The sustainability information in this factsheet can help investors integrate sustainability considerations in their process. This information is for informational purposes only. The reported sustainability information may not at all be used in relation to binding elements for this fund. A decision to invest should take into account all characteristics or objectives of the fund as described in the prospectus. The prospectus is available on request and free of charge on the Robeco website.

## Sustainability

The fund's sustainable investment objective is to help mitigate the resource scarcity challenge within industries while supporting economic growth. Resource scarcity and sustainability considerations are incorporated in the investment process by the means of a target universe definition, exclusions, ESG integration, a carbon footprint target and voting. The fund only invests in companies that have a significant thematic fit as per Robeco's thematic universe methodology. Through screening on both Robeco's internally developed SDG Framework and Robeco's exclusion policy, the fund does not invest in issuers that have a negative impact on the SDGs, are in breach of international norms or where products have been deemed controversial. Financially material ESG factors are integrated in the bottom-up fundamental investment analysis to assess existing and potential ESG risks and opportunities. The fund's weighted carbon footprint will be equal to or better than that of its Climate Transition Benchmark. In addition, where a stock issuer is flagged for breaching international standards in the ongoing monitoring, the issuer will become subject to exclusion. Lastly, the fund makes use of shareholder rights and applies proxy voting in accordance with Robeco's proxy voting policy.

For more information please visit the sustainability-related disclosures.

The index used for all sustainability visuals is based on MSCI World Index TRN.

## SDG Impact Alignment

This distribution across SDG scores shows the portfolio weight allocated to companies with a positive, negative and neutral impact alignment with the Sustainable Development Goals (SDG) based on Robeco's SDG Framework. The framework utilizes a three-step approach to assess a company's impact alignment with the relevant SDGs and assign a total SDG score. The score ranges from positive to negative impact alignment with levels from high, medium or low impact alignment. This results in a 7-step scale from -3 to +3. For comparison, index figures are provided alongside that of the portfolio. Only holdings mapped as corporates are included in the figures.

Use of the United Nations Sustainable Development Goals (SDG) logos, including the colour wheel, and icons shall only serve explanatory and illustrative purposes and may not be interpreted as an endorsement by the United Nations of this entity, or the product(s) or service(s) mentioned in this document. The opinions or interpretations shown in this document hence do not reflect the opinion or interpretations of the United Nations.

Sustainalytics ESG Risk Rating

The Portfolio Sustainalytics ESG Risk Rating chart displays the portfolio's ESG Risk Rating. This is calculated by multiplying each portfolio component's Sustainalytics ESG Risk Rating by its respective portfolio weight. The Distribution across Sustainalytics ESG Risk levels chart shows the portfolio allocations broken into Sustainalytics' five ESG risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+), providing an overview of portfolio exposure to the different ESG risk levels. Index scores are provided alongside the portfolio scores, highlighting the portfolio's ESG risk level compared to the index. Only holdings mapped as corporates are included in the figures.

Environmental Footprint

Environmental footprint expresses the total resource consumption of the portfolio per mUSD invested. Each assessed company's footprint is calculated by normalizing resources consumed by the company's enterprise value including cash (EVIC). We aggregate these figures to portfolio level using a weighted average, multiplying each assessed portfolio constituent's footprint by its respective position weight. For comparison, index footprints are shown besides that of the portfolio. The equivalent factors that are used for comparison between the portfolio and index represent European averages and are based on third-party sources combined with own estimates. As such, the figures presented are intended for illustrative purposes and are purely an indication. Only holdings mapped as corporates are included in the figures.

## Engagement

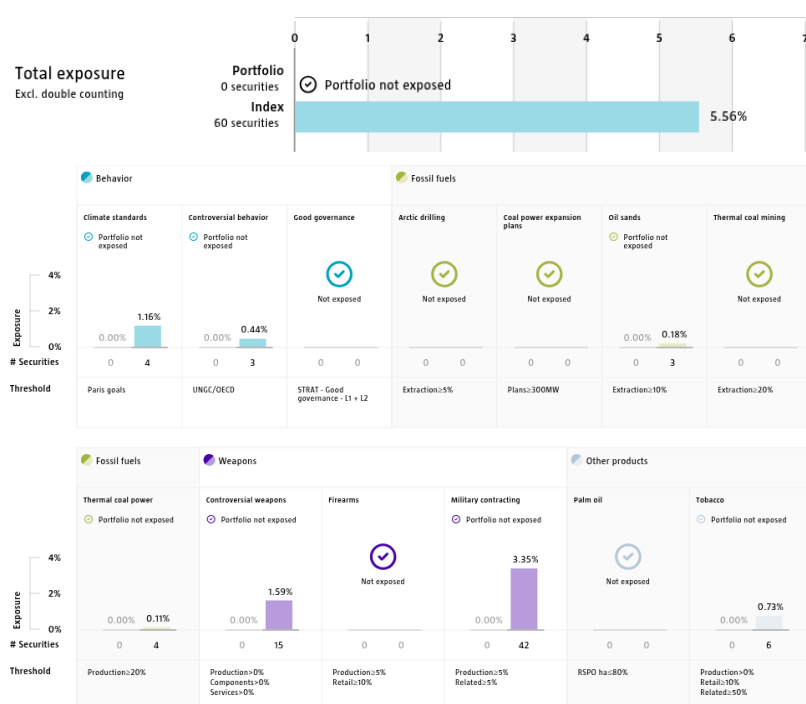

Robeco distinguishes between three types of engagement. Value Engagement focuses on long-term issues that are financially material and/or are causing adverse sustainability impacts. The themes can be broken into Environmental, Social, Governance, or Voting-related. SDG Engagement aims to drive a clear and measurable improvement in a company's SDG contribution. Enhanced engagement is triggered by misconduct and focuses on companies severely breaching international standards. The report is based on all companies in the portfolio for which engagement activities have taken place during the past 12 months. Note that companies may be under engagement in multiple categories simultaneously. While the total portfolio exposure excludes double counting, it may not equal the sum of individual category exposures.

	Portfolio exposure	# companies engaged with	# activities with companies engaged with
Total (* excluding double counting)	16.46%	9	30
Environmental	11.85%	5	11
Social	0.00%	0	0
Governance	3.11%	3	17
Sustainable Development Goals	0.00%	0	0
Voting Related	3.01%	2	2
Enhanced	0.00%	0	0

## Exclusions

The Exclusions charts display the degree of adherence to exclusion applied by Robeco. For reference, index exposures are shown beside that of the portfolio. Thresholds are based on revenues unless otherwise indicated. For more information about the exclusion policy and which level applies, please refer to the Exclusion Policy and Exclusion List available on Robeco.com.

### Investment policy

Robeco Smart Materials Equities is an actively managed fund that invests globally in companies that provide innovative materials and process technologies. The selection of these stocks is based on fundamental analysis. The fund has sustainable investment as its objective, within the meaning of Article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on Sustainability-related disclosures in the financial sector. The strategy integrates sustainability criteria as part of the stock selection process and through a theme-specific sustainability assessment. The portfolio is built on the basis of an eligible investment universe that includes companies whose business models contribute to the thematic investment objectives. The assessment regarding relevant SDGs uses an internally developed framework, more information on which can be obtained at [www.robeco.com/si](http://www.robeco.com/si). The fund also aims to achieve a better return than the index.

The fund has sustainable investment as its objective within the meaning of Article 9 of the European Sustainable Finance Disclosure Regulation. The fund fosters solutions to reduce resource intensity in the economy by investing in more efficient, scalable materials that have lower emissions over the lifetime, mainly investing in companies that advance the UN Sustainable Development Goals (SDGs): Decent Work and Economic Growth, Industry, Innovation and Infrastructure, Sustainable Cities and Communities, and Responsible Consumption and Production and Climate Action. The fund integrates ESG (Environmental, Social and Governance) factors in the investment process and applies Robeco's Good Governance policy. The fund applies sustainability indicators, including but not limited to, normative, activity-based and region-based exclusions, carbon reduction target and proxy voting.

### Fund manager's CV

Pieter Busscher is Portfolio Manager of the Robeco Smart Materials and Robeco Smart Mobility strategies and member of the Thematic Investing team. He started at Robeco in 2007 as a Deputy Portfolio Manager for the Sustainable Water strategy. Pieter became the Portfolio Manager for Smart Materials in 2009; for Smart Mobility he had been Deputy Portfolio for since strategy launch in 2018 and took over the portfolio management responsibilities in 2021. He began his career at Credit Suisse Asset Management in Zurich in 2006. He graduated from the International Business at RSM Erasmus University (Bachelor), the Banking and Finance at the University of St. Gallen (Master) and is a CFA® Charterholder. Mutlu Gundogan is Co-Portfolio manager of the Robeco Smart Materials strategy and member of the Thematic Investing team. Prior to joining in 2021, he worked at ABN AMRO – ODDO BHF as a sell-side equity analyst, covering the European Chemicals sector. Before that, he worked as a sell-side analyst at ABN AMRO and Royal Bank of Scotland covering the Materials, Industrials, and Health Care sectors. He started his career in 2003 at Kempen & Co., where he covered the Industrials, Consumer Staples, and Health Care sectors. Mutlu holds a Master's in Business Administration from Vrije Universiteit Amsterdam. He is a CFA® Charterholder.

### Fiscal product treatment

The fund is established in Luxembourg and is subject to the Luxembourg tax laws and regulations. The fund is not liable to pay any corporation, income, dividend or capital gains tax in Luxembourg. The fund is subject to an annual subscription tax ('tax d'abonnement') in Luxembourg, which amounts to 0.05% of the net asset value of the fund. This tax is included in the net asset value of the fund. The fund can in principle use the Luxembourg treaty network to partially recover any withholding tax on its income.

### Fiscal treatment of investor

The fiscal consequences of investing in this fund depend on the investor's personal situation. For private investors in the Netherlands real interest and dividend income or capital gains received on their investments are not relevant for tax purposes. Each year investors pay income tax on the value of their net assets as at 1 January if and inasmuch as such net assets exceed the investor's tax-free allowance. Any amount invested in the fund forms part of the investor's net assets. Private investors who are resident outside the Netherlands will not be taxed in the Netherlands on their investments in the fund. However, such investors may be taxed in their country of residence on any income from an investment in this fund based on the applicable national fiscal laws. Other fiscal rules apply to legal entities or professional investors. We advise investors to consult their financial or tax adviser about the tax consequences of an investment in this fund in their specific circumstances before deciding to invest in the fund.
