

Robeco Quantum Market Neutral Equities F EUR

Robeco Quantum Market Neutral Equities is an actively managed fund that enables investors to benefit from opportunities in the worldwide equity market. The sub-fund follows a market-neutral equity strategy for quant investing with basic sustainability integration. Long positions (both traditional long and synthetic) are combined with short positions, which will be achieved through the use of financial derivative instruments. The sub-fund uses a quantitative model to select securities that offer favourable growth prospects at a reasonable price (long position) while selling securities of companies that seem to be overvalued (short position). The sub-fund uses a systematic and disciplined approach to rank the relative attractiveness of stocks based on fundamental, technical and sentiment variables, which are then interpreted by quantitative models. 'Quantum' stands for the investment management approach of the sub-fund which includes quantitative models that incorporate novel datasets, machine learning techniques and smart algorithms but under which trades are ultimately implemented by the Management Company. Such exposure may be obtained entirely through the use of derivatives and as a result the sub-fund may invest the liquid assets in deposits with credit institutions, money market instruments and money market funds.

Investment objective

The fund follows a bottom-up driven investment strategy to gain exposure to short term and alternative data alpha signals. The fund's target is market agnostic, consistent returns over cash, by taking well-diversified exposure to an integrated selection model. It systematically identifies and exploits market inefficiencies, which arise as a result of predictable patterns in investor behavior. The fund is well diversified and has a low correlation with equity and bond markets. The proprietary portfolio construction algorithm aims to maximize exposure to the alpha signals while explicitly taking risk and transaction costs into account.

Fiscal product treatment

The fund is established in Luxembourg and is subject to the Luxembourg tax laws and regulations. The fund is not liable to pay any corporation, income, dividend or capital gains tax in Luxembourg. The fund is subject to an annual subscription tax ('tax d'abonnement') in Luxembourg, which amounts to 0.05% of the net asset value of the fund. This tax is included in the net asset value of the fund. The fund can in principle use the Luxembourg treaty network to partially recover any withholding tax on its income.

Fiscal treatment of investor

The fiscal consequences of investing in this fund depend on the investor's personal situation. For private investors in the Netherlands real interest and dividend income or capital gains received on their investments are not relevant for tax purposes. Each year investors pay income tax on the value of their net assets as at 1 January if and inasmuch as such net assets exceed the investor's tax-free allowance. Any amount invested in the fund forms part of the investor's net assets. Private investors who are resident outside the Netherlands will not be taxed in the Netherlands on their investments in the fund. However, such investors may be taxed in their country of residence on any income from an investment in this fund based on the applicable national fiscal laws. Other fiscal rules apply to legal entities or professional investors. We advise investors to consult their financial or tax adviser about the tax consequences of an investment in this fund in their specific circumstances before deciding to invest in the fund.
