

Robeco Global SDG Credits DH EUR

Robeco Global SDG Credits is an actively managed fund that invests in corporate bonds in the global developed and emerging markets. The selection of these bonds is based on fundamental analysis. The fund's objective is to provide long term capital growth. The fund invests at least two-thirds of its total assets in non-government bonds (which may include contingent convertible bonds (also "coco" bonds)) and similar non-government fixed income securities and asset backed securities from all around the world. The fund will not invest into assets with a rating lower than "B-" by at least one of the recognized rating agencies. The fund takes into account the contribution of a company to the United Nations Sustainable Development Goals (SDG). The portfolio is built on the basis of the eligible investment universe and an internally developed SDG framework for mapping and measuring SDG contributions, about which more information can be obtained via the website www.robeco.com/si.

Performance

Indexed value (until 31-08-2025) - Source: Robeco

Performance

Based on transaction prices, the fund's return was 0.56%.

The Bloomberg Global Aggregate Corporate Bond Index returned 0.55% in August (hedged to EUR). Credit spreads widened on both sides of the Atlantic, with US IG 3 bps wider at 79 bps and EUR IG 6 bps wider at 84 bps, leading to negative credit excess returns of -0.09%. As a result, the month's performance was primarily driven by moves in underlying government bond yields, with US Treasuries rallying 14 bps to 4.23% while Bund yields inched 2 bps higher. The portfolio outperformed its benchmark before fees, driven primarily by strong issuer selection. Beta contributed negligibly to returns, as we maintained a near-neutral positioning throughout the month. Our overweight in European credit relative to US credit, along with our curve positioning, modestly detracted from performance. The bulk of the outperformance stemmed from true bottom-up selection, with notable contributions from names such as Edison International, ZF Friedrichshafen, Hiscox, Cellnex, and American National Group.

Market development

Markets were mixed in August, as strong earnings clashed with macro uncertainty and heavy supply. US equities advanced beyond Big Tech leadership, supported by one of the strongest earnings seasons of the past decade (ex-Covid), with widespread upside surprises versus preseason estimates. Bond yields eased on softer labor market signals, with the 10-year Treasury yield falling 14 bps to 4.23%, while Bund yields rose slightly, up 2 bps. At Jackson Hole, Powell struck a dovish tone, signaling a likely 25 bps September cut while firmly ruling out 50 bps, which markets fully priced in by month-end. The debate over Fed independence intensified after political efforts to remove Governor Lisa Cook, adding to market unease ahead of key data releases. In Europe, the ECB reiterated that policy is "in a good place", and rates are now expected to stay on hold at 2% through year-end. French political tensions ahead of a September 8 confidence vote briefly pressured OATs and bank spreads, though robust demand for corporate issuance helped stabilize credit. Credit spreads widened modestly, as heavy post-summer supply weighed on sentiment, with US IG 3 bps wider at 79 bps and EUR IG 6 bps wider at 84 bps.

Expectation of fund manager

Credit markets have rebounded strongly post-Liberation Day, with spreads tightening beyond pre-shock levels, driven by solid technicals and resilient demand. Fundamentals remain stable for now, though the true economic drag from tariffs and policy uncertainty has yet to filter through. US credit is supported by strong carry and cautious issuance, but the flatness of credit curves and stretched valuations limit upside. Europe continues to offer relative value, having lagged since Liberation Day, while EM credit benefits from lower leverage and improving macro tailwinds. High yield faces structural challenges as restructuring risk rises, with investor focus shifting up in quality. Tight spreads leave little margin for error, prompting conservative beta positioning. Selectivity, credit quality, and regional allocation remain critical in navigating the months ahead.

Top 10 largest positions

In our portfolio management, the most relevant issuer positions are those measured in risk points (weight x spread x duration). The largest positions consist of a mix of financials and industrials. Often, we have more than one bond holding in a specific name.

Sector allocation

In our portfolio management, we not only factor in weights, but also spreads and durations (DTS). On that basis, we are overweight in financials and underweight in non-financial corporates. Within financials, we are overweight in the banking sector. We hold an underweight position in corporate risk, primarily due to our stance on energy and utilities. Conversely, we are overweight in consumer cyclicals, as auto manufacturers and suppliers, affected by recent profit warnings, have underperformed and now present attractive valuations. We hold overweight positions in several utility-like agencies. Some of the underweights can be attributed to negative SDG scores.

Sector allocation		Deviation index	
Financials	47.8%	8.5%	
Industrials	29.2%	-22.3%	
Covered	5.9%	5.9%	
Treasuries	4.1%	4.1%	
Utilities	3.7%	-5.5%	
Agencies	3.5%	3.5%	
ABS	3.1%	3.1%	
Local Authorities	0.1%	0.1%	
Cash and other instruments	2.6%	2.6%	

Currency denomination allocation

Our exposure by currency of denomination may be driven by relative value between the markets on an aggregate level but is more typically the result of sector themes and issuer selection. All currency exposure is hedged back to the benchmark by default.

Currency denomination allocation		Deviation index	
Euro	56.3%	31.1%	
U.S. Dollar	35.3%	-30.6%	
Pound Sterling	5.8%	2.0%	
Canadian Dollar	0.0%	-3.2%	
Australian Dollar	0.0%	-0.7%	
Japanese Yen	0.0%	-0.7%	
Swiss Franc	0.0%	-0.4%	
Korean Won	0.0%	-0.1%	

Duration allocation

The duration of the portfolio was similar to that of the index.

Duration allocation		Deviation index	
U.S. Dollar	4.0	-0.3	
Euro	1.4	0.3	
Pound Sterling	0.2	0.0	
Canadian Dollar	0.2	0.0	

Rating allocation

Our positioning across the different rating buckets is the result of beta positioning, sector themes, and issuer selection.

Rating allocation		Deviation index	
AAA	12.3%	11.6%	
AA	7.3%	-0.4%	
A	30.4%	-13.9%	
BAA	40.8%	-6.5%	
BA	6.7%	6.7%	
Cash and other instruments	2.6%	2.6%	

Subordination allocation

In the allocation to the capital structure, we favor the bonds with solid risk-adjusted performance potential while taking into account the beta, sector themes, and the credit cycle. The exposure to subordinated bonds that we do have, is limited to positions that have both a good fundamental outlook as well as a robust bond structure.

Subordination type allocation		Deviation index	
Senior	76.8%	-16.4%	
Tier 2	10.4%	5.8%	
Hybrid	7.3%	5.2%	
Tier 1	1.8%	1.7%	
Cash and other instruments	2.6%	2.6%	

ESG Important information

The sustainability information in this factsheet can help investors integrate sustainability considerations in their process. This information is for informational purposes only. The reported sustainability information may not at all be used in relation to binding elements for this fund. A decision to invest should take into account all characteristics or objectives of the fund as described in the prospectus. The prospectus is available on request and free of charge on the Robeco website.

Sustainability

Sustainability is incorporated in the investment process by the means of a target universe, exclusions, ESG integration, and a minimum allocation to ESG-labeled bonds. The fund solely invests in credits issued by companies with a positive or neutral impact on the SDGs. The impact of issuers on the SDGs is determined by applying Robeco's internally developed three-step SDG Framework. The outcome is a quantified contribution expressed as an SDG score, considering both the contribution to the SDGs (positive, neutral or negative) and the extent of this contribution (high, medium or low). In addition, the fund does not invest in credit issuers that are in breach of international norms or where activities have been deemed detrimental to society following Robeco's exclusion policy. ESG factors are integrated in the bottom-up security analysis to assess the impact of financially material ESG risk on the issuer's fundamental credit quality. Furthermore, the fund invests at least 10% in green, social, sustainable, and/or sustainability-linked bonds. Lastly, where a credit issuer is flagged for breaching international standards in the ongoing monitoring, the issuer will become subject to exclusion.

For more information please visit the sustainability-related disclosures.

The index used for all sustainability visuals is based on Bloomberg Global Aggregate Corporates Index.

SDG Impact Alignment

This distribution across SDG scores shows the portfolio weight allocated to companies with a positive, negative and neutral impact alignment with the Sustainable Development Goals (SDG) based on Robeco's SDG Framework. The framework utilizes a three-step approach to assess a company's impact alignment with the relevant SDGs and assign a total SDG score. The score ranges from positive to negative impact alignment with levels from high, medium or low impact alignment. This results in a 7-step scale from -3 to +3. For comparison, index figures are provided alongside that of the portfolio. Only holdings mapped as corporates are included in the figures.

Use of the United Nations Sustainable Development Goals (SDG) logos, including the colour wheel, and icons shall only serve explanatory and illustrative purposes and may not be interpreted as an endorsement by the United Nations of this entity, or the product(s) or service(s) mentioned in this document. The opinions or interpretations shown in this document hence do not reflect the opinion or interpretations of the United Nations.

Sustainalytics ESG Risk Rating

The Portfolio Sustainalytics ESG Risk Rating chart displays the portfolio's ESG Risk Rating. This is calculated by multiplying each portfolio component's Sustainalytics ESG Risk Rating by its respective portfolio weight. The Distribution across Sustainalytics ESG Risk levels chart shows the portfolio allocations broken into Sustainalytics' five ESG risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+), providing an overview of portfolio exposure to the different ESG risk levels. Index scores are provided alongside the portfolio scores, highlighting the portfolio's ESG risk level compared to the index.

Only holdings mapped as corporates are included in the figures.

Source: Copyright ©2025 Sustainalytics. All rights reserved.

Environmental Footprint

Environmental footprint expresses the total resource consumption of the portfolio per mUSD invested. Each assessed company's footprint is calculated by normalizing resources consumed by the company's enterprise value including cash (EVIC). We aggregate these figures to portfolio level using a weighted average, multiplying each assessed portfolio constituent's footprint by its respective position weight. For comparison, index footprints are shown besides that of the portfolio. The equivalent factors that are used for comparison between the portfolio and index represent European averages and are based on third-party sources combined with own estimates. As such, the figures presented are intended for illustrative purposes and are purely an indication. Only holdings mapped as corporates are included in the figures.

The content is not a recommendation to buy, sell or hold such investment or security, nor does it address suitability of an investment or security and should not be relied on as investment advice.

ESG Labeled Bonds

The ESG-labeled bond chart displays the portfolio's exposure to ESG-labeled bonds. Specifically, green bonds, social bonds, sustainability bonds, and sustainability-linked bonds. This is calculated as a sum of weights for those bonds in the portfolio that have one of above mentioned labels. Index exposure figures are provided alongside the portfolio exposure figures, highlighting the difference with the index.

Engagement

Robeco distinguishes between three types of engagement. Value Engagement focuses on long-term issues that are financially material and/or are causing adverse sustainability impacts. The themes can be broken into Environmental, Social, Governance, or Voting-related. SDG Engagement aims to drive a clear and measurable improvement in a company's SDG contribution. Enhanced engagement is triggered by misconduct and focuses on companies severely breaching international standards. The report is based on all companies in the portfolio for which engagement activities have taken place during the past 12 months. Note that companies may be under engagement in multiple categories simultaneously. While the total portfolio exposure excludes double counting, it may not equal the sum of individual category exposures.

	Portfolio exposure	# companies engaged with	# activities with companies engaged with
Total (* excluding double counting)	10.86%	23	94
Environmental	6.58%	11	48
Social	2.96%	6	17
Governance	0.27%	2	9
Sustainable Development Goals	0.71%	5	19
Voting Related	0.62%	1	1
Enhanced	0.00%	0	0

Exclusions

The Exclusions charts display the degree of adherence to exclusion applied by Robeco. For reference, index exposures are shown beside that of the portfolio. Thresholds are based on revenues unless otherwise indicated. For more information about the exclusion policy and which level applies, please refer to the Exclusion Policy and Exclusion List available on Robeco.com.

Investment policy

Robeco Global SDG Credits is an actively managed fund that invests in corporate bonds in the global developed and emerging markets. The selection of these bonds is based on fundamental analysis. The fund's objective is to provide long term capital growth. The fund invests at least two-thirds of its total assets in non-government bonds (which may include contingent convertible bonds (also "coco" bonds)) and similar non-government fixed income securities and asset backed securities from all around the world. The fund will not invest into assets with a rating lower than "B-" by at least one of the recognized rating agencies. The fund takes into account the contribution of a company to the United Nations Sustainable Development Goals (SDG). The portfolio is built on the basis of the eligible investment universe and an internally developed SDG framework for mapping and measuring SDG contributions, about which more information can be obtained via the website www.robeco.com/si. The fund promotes E&S (i.e. Environmental and Social) characteristics within the meaning of Article 8 of the European Sustainable Finance Disclosure Regulation, integrates ESG (Environmental, Social and Governance) factors in the investment process and applies Robeco's Good Governance policy. The fund aims to advance the UN Sustainable Development Goals (SDGs) by investing in companies whose business models and operational practices are aligned with targets defined by the 17 UN SDGs. The fund applies sustainability indicators, including but not limited to, normative, activity-based and region-based exclusions.

Fund manager's CV

Matthew Jackson is Portfolio Manager Global Investment Grade in the Credit team. He joined Robeco in 2024 from Western Asset Management in London where he started his career in the industry in 2003 and consequently held roles of Risk Analyst, Portfolio Analyst, Research Analyst and Portfolio Manager of numerous dedicated credit funds and mandates. He holds a Bachelor's in Economics (Hons) from the University of Sheffield. Daniel Ender is Portfolio Manager Investment Grade in the Credit team. Previously, he was a Credit Analyst at Actiam. Daniel started his career in the industry in 2018 at ABN AMRO. He has a Master's in Financial Economics from Erasmus University Rotterdam and a Bachelor's in Political Science and Economics from the University of Connecticut. Daniel also is CFA® charterholder. Evert Giesen is Portfolio Manager Investment Grade in the Credit team. Previously, he was an Analyst, responsible for covering the Automotive sector within the Credit team. Prior to joining Robeco in 2001, Evert worked at AEGON Asset Management for four years as a Fixed Income Portfolio Manager. He has been active in the industry since 1997 and holds a Master's in Econometrics from Tilburg University. Joost Breeuwsma is Portfolio Manager Investment Grade in the Credit team. He has a focus on European investment grade portfolios and global green bond portfolios. Prior to starting his career and joining Robeco in 2017 as a credit analyst, he obtained a Master's with Distinction in Financial Mathematics from King's College London.

Fiscal product treatment

The fund is established in Luxembourg and is subject to the Luxembourg tax laws and regulations. The fund is not liable to pay any corporation, income, dividend or capital gains tax in Luxembourg. The fund is subject to an annual subscription tax ('tax d'abonnement') in Luxembourg, which amounts to 0.05% of the net asset value of the fund. This tax is included in the net asset value of the fund. The fund can in principle use the Luxembourg treaty network to partially recover any withholding tax on its income.

Fiscal treatment of investor

The fiscal consequences of investing in this fund depend on the investor's personal situation. For private investors in the Netherlands real interest and dividend income or capital gains received on their investments are not relevant for tax purposes. Each year investors pay income tax on the value of their net assets as at 1 January if and inasmuch as such net assets exceed the investor's tax-free allowance. Any amount invested in the fund forms part of the investor's net assets. Private investors who are resident outside the Netherlands will not be taxed in the Netherlands on their investments in the fund. However, such investors may be taxed in their country of residence on any income from an investment in this fund based on the applicable national fiscal laws. Other fiscal rules apply to legal entities or professional investors. We advise investors to consult their financial or tax adviser about the tax consequences of an investment in this fund in their specific circumstances before deciding to invest in the fund.
