Management B.V.

Investment objective

Robeco Dynamic Theme Machine UCITS ETF is an actively managed Sub-fund that invests in attractive stocks of upcoming themes. The Manager believes that the value of investing in themes is best achieved when exposure is generated to them early in their lifecycle, and so the aim of the investment strategy of the Fund is to identify themes as they begin to emerge and then to exit them as their attractiveness reduces. The investment management approach for the Fund therefore seeks to evaluate optimal entry and exit points for themes and stocks on a continuous basis, constantly adapting to evolving markets.

t | Figures as of 31-08-2025

Sector allocation

The sub-fund can deviate substantially from the weightings of the benchmark. The management company has discretion over the composition of the portfolio, subject to the investment objectives. The sub-fund aims to achieve returns equal to, or greater than, those of the benchmark, while still controlling relative risk through the applications of limits (on countries and sectors) to the extent of deviation from the benchmark.

Sector allocation	Deviation index	
Information Technology	38.4%	12.1%
Health Care	20.3%	11.0%

Factsheet

I Figures as of 31-08-2025

ESG Important information

The sustainability information in this factsheet can help investors integrate sustainability considerations in their process. This information is for informational purposes only. The reported sustainability information may not at all be used in relation to binding elements for this fund. A decision to invest should take into account all characteristics or objectives of the fund as described in the prospectus. The prospectus is available on request and free of charge on the Robeco website.

Sustainability

The fund incorporates sustainability in the investment process through exclusions, ESG integration, engagement and voting. The fund does not invest in issuers that are in breach of international norms or where activities have been deemed detrimental to society following Robeco's exclusion policy. Financially material ESG factors are integrated in the bottom-up investment analysis to assess existing and potential ESG risks and opportunities. The fund also excludes stocks issued by companies that have a high negative impact on the Sustainable Development Goals (SDGs). The impact of issuers on the SDGs is determined by applying Robeco's internally developed three-step SDG Framework. Financially material ESG factors are integrated in the portfolio construction to ensure the ESG score of the portfolio is at least 5% better than that of the index. In addition, the environmental footprints of the fund are made lower than that of the benchmark by restricting the GHG emissions, water use and waste generation. The target is to achieve 20% lower GHG emissions and 20% lower water use and waste generation compared to the index. With these portfolio construction rules, stocks issued by companies with better ESG scores or environmental footprints are more likely to be included in the portfolio while stocks issued by companies with worse ESG scores or environmental footprints are more likely to be divested from the portfolio. Lastly, the fund makes use of shareholder rights and applies proxy voting in accordance with Robeco's proxy voting policy.

For more information please visit the sustainability-related disclosures.

Sustainalytics ESG Risk Rating

The Portfolio Sustainalytics ESG Risk Rating chart displays the portfolio's ESG Risk Rating. This is calculated by multiplying each portfolio component's Sustainalytics ESG Risk Rating by its respective portfolio weight. The Distribution across Sustainalytics ESG Risk levels chart shows the portfolio allocations broken into Sustainalytics' five ESG risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+), providing an overview of portfolio exposure to the different ESG risk levels. Index scores are provided alongside the portfolio scores, highlighting the portfolio's ESG risk level compared to the index.

Only holdings mapped as corporates are included in the figures.

Environmental Footprint

Environmental footprint expresses the total resource consumption of the portfolio per mUSD invested. Each assessed company's footprint is calculated by normalizing resources consumed by the company's enterprise value including cash (EVIC). We aggregate these figures to portfolio level using a weighted average, multiplying each assessed portfolio constituent's footprint by its respective position weight. For comparison, index footprints are shown besides that of the portfolio. The equivalent factors that are used for comparison between the portfolio and index represent European averages and are based on third-party sources combined with own estimates. As such, the figures presented are intended for illustrative purposes and are purely an indication. Only holdings mapped as corporates are included in the figures.

tsheet | Figures as of 31-08-2025

SDG Impact Alignment

This distribution across SDG scores shows the portfolio weight allocated to companies with a positive, negative and neutral impact alignment with the Sustainable Development Goals (SDG) based on Robeco's SDG Framework. The framework utilizes a three-step approach to assess a company's impact alignment with the relevant SDGs and assign a total SDG score. The score ranges from positive to negative impact alignment with levels from high, medium or low impact alignment. This results in a 7-step scale from -3 to +3. For comparison, index figures are provided alongside that of the portfolio. Only holdings mapped as corporates are included in the figures.

Source: Robeco. Data derived from internal processes.

Engagement

Robeco distinguishes between three types of engagement. Value Engagement focuses on long-term issues that are financially material and/or are causing adverse sustainability impacts. The themes can be broken into Environmental, Social, Governance, or Voting-related. SDG Engagement aims to drive a clear and measurable improvement in a company's SDG contribution. Enhanced engagement is triggered by misconduct and focuses on companies severely breaching internationals standards. The report is based on all companies in the portfolio for which engagement activities have taken place during the past 12 months. Note that companies may be under engagement in multiple categories simultaneously. While the total portfolio exposure excludes double counting, it may not equal the sum of individual category exposures.

	Portfolio exposure	# companies engaged with	# activities with companies engaged with
Total (* excluding double counting)	29.88%	15	67
Environmental	2.31%	1	5
路 Social	3.17%	2	4
⊆ Governance	7.12%	2	5
 Sustainable Development Goals 	18.87%	11	53
🔀 Voting Related	0.00%	0	0
⚠ Enhanced	0.00%	0	0

Exclusions

The Exclusions charts display the degree of adherence to exclusion applied by Robeco. For reference, index exposures are shown beside that of the portfolio. Thresholds are based on revenues unless otherwise indicated. For more information about the exclusion policy and which level applies, please refer to the Exclusion Policy and Exclusion List available on Robeco.com.

actsheet | Figures as of 31-08-2025

Investment policy

Robeco Dynamic Theme Machine UCITS ETF is an actively managed Sub-fund that seeks to provide exposure to attractive stocks that are exposed to emerging long-term macro-economic, technological, environmental, demographic and healthcare related themes. The Manager will select the most relevant themes and dynamically rotate through them as they evolve over time, based on the approach described below. The Fund will utilise the quantitative and qualitative investing expertise of the Manager. The Manager has discretion to select the themes that the Fund will be invested in.

The Sub-fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Sub-fund takes explicitly into account the contribution of a company to the United Nations Sustainable Development Goals (SDG). The Sub-fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in the prospectus.

Fund manager's CV

Wouter Tilgenkamp is Portfolio Manager Quantitative Equities. Wouter joined Robeco in 2016 as a Data Scientist. He started his financial career in 2014 as Derivative Trader at Optiver.
