### What is this product?

<b>Type:</b>	Company With Variable Capital (SICAV) – Undertaking for Collective Investment in Transferable Securities incorporated under Luxembourg law.
<b>Objective:</b>	Robeco Quantum Market Neutral Equities is an actively managed fund that enables investors to benefit from opportunities in the worldwide equity market. The sub-fund follows a market-neutral equity strategy for quant investing with basic sustainability integration. Long positions (both traditional long and synthetic) are combined with short positions, which will be achieved through the use of financial derivative instruments. The sub-fund uses a quantitative model to select securities that offer favourable growth prospects at a reasonable price (long position) while selling securities of companies that seem to be overvalued (short position). The sub-fund uses a systematic and disciplined approach to rank the relative attractiveness of stocks based on fundamental, technical and sentiment variables, which are then interpreted by quantitative models. 'Quantum' stands for the investment management approach of the sub-fund which includes quantitative models that incorporate novel datasets, machine learning techniques and smart algorithms but under which trades are ultimately implemented by the Management Company. Such exposure may be obtained entirely through the use of derivatives and as a result the sub-fund may invest the liquid assets in deposits with credit institutions, money market instruments and money market funds. The fund is classified as falling under Article 6 of Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector.
<b>Benchmark:</b>	ICE BofA ESTR Overnight Rate Index The Sub-Fund is actively managed. The investment policy is not constrained by the Benchmark but the Sub-fund uses the Benchmark for performance comparison purposes in its marketing materials and for performance fee calculation.
<b>Currency:</b>	The Sub-fund aims to align the currency exposure of the Sub-fund with the Benchmark including through the use of derivatives.
<b>Subscription and Redemption:</b>	You can purchase or sell (partial) units any given workday, with the exception of Fund Holidays. An overview of fund holidays can be retrieved from <a href="http://www.robeco.com/riam">www.robeco.com/riam</a> .
<b>Dividend policy:</b>	Accumulating
<b>Intended Retail Investor:</b>	This Sub-fund is suitable for informed and/or experienced Investors who are highly interested in specialized capital markets, and are aware of the risks. The Sub-fund does not provide a capital guarantee. The Investor must be able to accept substantial volatility. This Sub-fund is suitable for Investors who can afford to set aside the capital for at least 3-5 years. It can accommodate the investment objective of capital growth, income and/or portfolio diversification. The Sub-fund is suitable for Investors who are capable of assessing and understanding the risks associated with funds with extensive use of financial derivatives.
<b>Term:</b>	The fund does not have a fixed term of existence or maturity period. In certain circumstances, as described in the fund documentation, the fund may be unilaterally terminated following written notice to shareholders subject to compliance with the fund documentation and applicable regulation.
<b>Other Information:</b>	The depositary of the SICAV is J.P. Morgan SE. The English prospectus, the semi annual report and the details of the remuneration policy of the management company are documents required by law and can be obtained free of charge on <a href="http://www.robeco.com/riam">www.robeco.com/riam</a> . The website also publishes the latest prices and other information.

### What are the risks and what could I get in return?

#### Risk Indicator

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Be aware of currency risk. If you receive payments in a currency different to that of your home jurisdiction, the final return you will get will depend on the exchange rate between the two currencies.

This risk is not considered in the risk indicator shown. If we are not able to pay you what is owed, you could lose your entire investment. This product does not include any protection from future market performance so you could lose some or all of your investment.

The following data are deemed material for this fund, and are not (adequately) reflected by the indicator:

- A derivative counterparty may fail to fulfil its obligations which could result in a loss. Counterparty risk is reduced via the exchange of collateral.
- The fund invests in assets that could become less liquid in certain market conditions, which could have a significant impact on the value of these assets. Investors may face significant difficulties in terms of time or costs for disinvesting subject to specific market conditions.
- The fund is managed using quantitative models. Materialisation of the model risk may be detrimental to fund performance.
- For more details about portfolio risks, see Section 4. "Risk Considerations" of the prospectus.

#### Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years.

<b>Recommended holding period</b>	<b>5 years</b>
<b>Example Investment</b>	10,000 EUR

Performance Scenarios		
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	
Stress	If you exit after 1 year	If you exit after 5 years
What you might get back after costs	8,820 EUR	8,350 EUR
Average return each year	-11.8%	-3.5%
Unfavourable	If you exit after 1 year	If you exit after 5 years
What you might get back after costs	9,080 EUR	8,350 EUR
Average return each year	-9.2%	-3.5%
Moderate	If you exit after 1 year	If you exit after 5 years
What you might get back after costs	9,800 EUR	8,790 EUR
Average return each year	-2.0%	-2.6%
Favourable	If you exit after 1 year	If you exit after 5 years
What you might get back after costs	10,710 EUR	9,360 EUR
Average return each year	7.1%	-1.3%

Unfavourable: This type of scenario occurred for an investment between February 2016 and January 2021.

Moderate: This type of scenario occurred for an investment between July 2019 and June 2024.

Favourable: This type of scenario occurred for an investment between June 2018 and May 2023.

## What happens if Robeco Institutional Asset Management B.V. is unable to pay out?

The fund's assets are held separately from Robeco Institutional Asset Management B.V. (the "Manager"). A pay-out of the fund's assets is thus not affected by the financial position or potential default of the Manager. The financial instruments in the portfolio of the fund are placed in custody with J.P. Morgan SE (the "Depository"). The fund runs the risk that its assets placed in custody may be lost as a result of the liquidation, insolvency, bankruptcy, negligence of, or fraudulent activities by, the Depository. In that case the fund may suffer a financial loss. However this risk is mitigated to some extent as the Depository is required by law to keep the fund's assets separate from its own assets. An investor compensation or guarantee scheme is not applicable in case of such financial loss.

## What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs have on your investment over time.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product [and how well the product does]. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested. For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	142 EUR	649 EUR
<b>Annual cost impact (*)</b>	1.40%	1.40% each year

\*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be -0.012% before costs and -0.026% after costs.

### Composition of costs

One-off costs upon entry or exit	If you exit after 1 year
Entry costs	0.00% of the amount you pay in when entering this investment. This is the most you will be charged. The person selling you the product will inform you of the actual charge. 0 EUR
Exit costs	0.00% of your investment before it is paid out to you. This is the most you will be charged. The person selling you the product will inform you of the actual charge. 0 EUR

### Ongoing costs taken each year

Management fees and other administrative or operating costs	0.96% of the value of your investment per year. This is an estimate based on actual costs over the last year.	96 EUR
Transaction costs	0.46% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	46 EUR

#### Incidental costs taken under specific conditions

Performance fees	15.00% The actual amount will vary depending on how well your investment performs. The aggregated cost estimation includes the average over the last 5 years.	0 EUR
------------------	---	-------

## How long should I hold it and can I take money out early?

We have determined the recommended holding period of this product to be 5 years.

The recommended holding period of this product is determined taking into consideration the nature of underlying investment securities and the volatility of thereof. The product can be traded daily and no minimum holding period applies. Exiting before the end of the recommended holding period does not bear any additional risks or costs other than those mentioned in the text above.

## How can I complain?

Complaints about the behaviour of the person who advised you on the product or sold it to you, should be addressed directly to that person. Complaints about the product or the behaviour of the manufacturer of this product should be directed to the following address:
