What is this product?

Type:	Irish Collective Asset-management Vehicle – Undertaking for Collective Investments in Transferable Securities under Irish law.
Objective:	<p>Robeco Climate Euro Government Bond UCITS ETF is actively managed and provides exposure to Euro denominated government bonds with an equal or better weighted average Country Transition Score as compared to the Benchmark. To this end, the Fund invests in Euro denominated government bonds as defined by the Benchmark and/or the Parent Index to construct a portfolio with an equal or better weighted average Country Transition Score than the Benchmark. The Manager strives to align the risk and return profile of the Fund with the Parent Index by employing quantitative techniques. In this process, the Country Transition Score and Green Bond allocation serve as model constraints, followed by an optimization that allocates bonds to ensure the portfolio's yield and duration closely match those of the Parent Index. The Fund will hold an equal or higher allocation to Green Bonds relative to the Benchmark.</p> <p>The Fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector. The Fund takes explicitly into account the contribution of a company to the United Nations Sustainable Development Goals (SDG). The Fund strives for economic results, while at the same time taking into account environmental, social and governance characteristics which are further explained in the prospectus.</p>
Benchmark:	<p>FTSE EMU Broad Government Bond Index</p> <p>The Fund is actively managed and provides exposure to Euro denominated government bonds with an equal or better weighted average Country Transition Score as compared to the Benchmark. What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Be aware of currency risk. If you receive payments in a currency different to that of your home jurisdiction, the final return you will get will depend on the exchange rate between the two currencies.

This risk is not considered in the risk indicator shown. If we are not able to pay you what is owed, you could lose your entire investment. This product does not include any protection from future market performance so you could lose some or all of your investment.

The following data are deemed material for this fund, and are not (adequately) reflected by the indicator:

- A derivative counterparty may fail to fulfill its obligations which could result in a loss. Counterparty risk is reduced via the exchange of collateral.
- The fund is managed using quantitative models. Materialisation of the model risk may be detrimental to fund performance.
- For more details about portfolio risks, see Section "Risk Factors" of the prospectus.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years.

Recommended holding period	3 years	
Example Investment	10,000 EUR	
Performance Scenarios		
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	
Stress	If you exit after 1 year	If you exit after 3 years

What happens if Robeco Institutional Asset Management B.V. is unable to pay out?

The fund's assets are held separately from Robeco Institutional Asset Management B.V. (the "Manager"). A pay-out of the fund's assets is thus not affected by the financial position or potential default of the Manager. The financial instruments in the portfolio of the fund are placed in custody with J.P. Morgan SE (the "Depositary"). The fund runs the risk that its assets placed in custody may be lost as a result of the liquidation, insolvency, bankruptcy, negligence of, or fraudulent activities by, the Depositary. In that case the fund may suffer a financial loss. However this risk is mitigated to some extent as the Depositary is required by law to keep the fund's assets separate from its own assets. An investor compensation or guarantee scheme is not applicable in case of such financial loss.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs have on your investment over time.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product (and how well the product does). The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested. For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	13 EUR	40 EUR
Annual cost impact (*)	0.10%	0.10% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 0.011% before costs and 0.009% after costs.

Composition of costs

One-off costs upon entry or exit	If you exit after 1 year
Entry costs	0.00% of the amount you pay in when entering this investment. This is the most you will be charged. The person selling you the product will inform you of the actual charge.
Exit costs	0.00% of your investment before it is paid out to you. This is the most you will be charged. The person selling you the product will inform you of the actual charge.

Ongoing costs taken each year

Management fees and other administrative or operating costs	0.12% of the value of your investment per year. This is an estimate based on actual costs over the last year.	12 EUR
Transaction costs	0.01% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	1 EUR

Incidental costs taken under specific conditions

Performance fees	There is no performance fee for this product.	0 EUR

How long should I hold it and can I take money out early?

We have determined the recommended holding period of this product to be 3 years.

The recommended holding period of this product is determined taking into consideration the nature of underlying investment securities and the volatility of thereof. The product can be traded daily and no minimum holding period applies. Exiting before the end of the recommended holding period does not bear any additional risks or costs other than those mentioned in the text above.
